

Recombinant Full Length Human CRHR1 Protein

Cat. No. CRHR1-585HF Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human CRHR1 was expressed in Wheat Germ.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	444 amino acids
Description	This gene encodes a G-protein coupled receptor that binds neuropeptides of the corticotropin releasing hormone family that are major regulators of the hypothalamic-pituitary-adrenal pathway. The encoded protein is essential for the activation of signal transduction pathways that regulate diverse physiological processes including stress, reproduction, immune response and obesity. Alternative splicing results in multiple transcript variants. Readthrough transcription also exists between this gene and upstream GenelD:401884 (ADP-ribosylation factor 3 pseudogene), and the readthrough transcripts encode isoforms that share similarity with the products of this gene.
Form	25 mM Tris-HCl of pH8.0 containing 2% glycerol.
Molecular Mass	47.7 kDa
