

Recombinant Human CTNND1 Protein, His-tagged

Cat. No. CTNND1-15H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human CTNND1 protein with a His-tag was expressed in E. coli
Species	Human
Source	E.coli
ProteinLength	325-869 aa
Description	This gene encodes a member of the Armadillo protein family, which function in adhesion between cells and signal transduction. Multiple translation initiation codons and alternative splicing result in many different isoforms being translated. Not all of the full-length natures of the described transcript variants have been determined. Read-through transcription also exists between this gene and the neighboring upstream thioredoxin-related transmembrane protein 2 (TMX2) gene.
Molecular Mass	The protein has a calculated MW of 61 kDa.
