

Recombinant Full Length Human CYP19A1 Protein

Cat. No. CYP19A1-112HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human Aromatase with a N terminal proprietary tag: predicted molecular weight 49.98 kDa.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	219 amino acids
Description	<p>This gene encodes a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. This protein localizes to the endoplasmic reticulum and catalyzes the last steps of estrogen biosynthesis, three successive hydroxylations of the A ring of androgens. Mutations in this gene can result in either increased or decreased aromatase activity; the associated phenotypes suggest that estrogen functions both as a sex steroid hormone and in growth or differentiation. The gene expresses two transcript variants.</p>
