

Recombinant Mouse Cenpa Protein, MYC/DDK-tagged

Cat. No. Cenpa-877M Lot. No. (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of full-length mouse centromere protein A (Cenpa), with C-terminal MYC/DDK tag, was expressed in HEK293T cells.
Species	Mouse
Source	HEK293
Description	<p>Centromeres are the differentiated chromosomal domains that specify the mitotic behavior of chromosomes. This gene encodes a centromere protein which contains a histone H3 related histone fold domain that is required for targeting to the centromere. Centromere protein A is proposed to be a component of a modified nucleosome or nucleosome-like structure in which it replaces 1 or both copies of conventional histone H3 in the (H3-H4)₂ tetrameric core of the nucleosome particle. The protein is a replication-independent histone that is a member of the histone H3 family. Alternative splicing results in multiple transcript variants encoding distinct isoforms.</p>
Molecular Mass	15.5 kDa
Purity	>80% as determined by SDS-PAGE and Coomassie blue staining
Stability	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
Storage	Store at -80 centigrade after receiving vials.

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Concentration >50 g/mL as determined by microplate BCA method

Storage Buffer 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.

GENE INFORMATION

Gene Name Cenpa centromere protein A [Mus musculus (house mouse)]

Official Symbol Cenpa

Synonyms Cenpa; centromere protein A; Cenp-A; histone H3-like centromeric protein A; centromere autoantigen A; centrosomin A

Gene ID 12615

mRNA Refseq NM_007681

Protein Refseq NP_031707

UniProt ID O35216
