

Human Cerebral Cortex Membrane Lysate

Cat. No. Cerebral Cortex-74H **Lot. No.** (See product label)

SPECIFICATION

Species	Human
Source	Human Brain: Cerebral Cortex
Concentration	2 mg/mL or better
Tissue Type	Brain: Cerebral Cortex
Shipping	Dry ice
Preparation method	<p>Human brain cerebral Cortex tissue membrane protein lysate was prepared by isolating the membrane protein from whole tissue homogenates using a proprietary technique. The human cerebral Cortex tissue was frozen in liquid nitrogen immediately after excision and then stored at -70°C. The membrane protein is provided in a buffer including HEPES (pH 7.9), MgCl₂, KCl, EDTA, Sucrose, Glycerol, sodium deoxycholate, NP-40, and a cocktail of protease inhibitors. For quality control purposes, the isolated brain cerebral Cortex tissue membrane protein pattern on SDS-PAGE gel is shown to be consistent for each lot by visualization with coomassie blue staining. The isolated brain cerebral Cortex tissue membrane protein is then Western analyzed by either GAPDH or β-actin antibody to confirm there is no signal or very weak signal.</p>
Diagnosis	Normal
Storage Buffer	HEPES pH 7.9, MgCl ₂ , KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, and

NP-40.

Storage Instruction

Store at 2-8°C for continuous use. For extended storage, freeze working aliquots at -70°C. Repeated freezing and thawing is not recommended. Under proper storage conditions the shelf life is half a year from the date of receipt.

Applications

Brain: cerebral cortex membrane protein lysate is for use in Western blotting, 10 µg to 20 µg per lane is recommended for mini gel.
