

Native Bovine Collagen Type III

Cat. No. Collagen-315B **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Bovine Collagen Type III has been prepared from bovine placenta and is chromatographically and immunologically pure. Bovine Collagen Type III is free from other collagens, serum proteins and non-collagen extracellular matrix proteins. Bovine Collagen Type III reacts with anti-Collagen Type III.
Species	Bovine
Description	Bovine Collagen Type III is one of a family of proteins found particularly in the flesh and connective tissues of mammals (approximately one-third of the body's total protein). Over two dozen types of collagen have been described, though Type III is the collagen associated with granulation tissues formed during healing.
Applications	ELISA : 1:10,000 Western Blot : 1:1000 Immunohistochemistry: 1:100-1:500 Other Dilution: User Optimized
Usage	This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.
Storage	Store vial at 4°C prior to opening. This product is stable at 4°C as an undiluted liquid.
