

Native Snake Russells Viper Venom Factor X Activator

Cat. No. F10-28S **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified from Russells Viper Venom.
Species	Snake
Source	Snake Venom
Description	Zinc dependant endopeptidase that activates Factor X to Xa and Factor IX to IXa-alpha. This protease is inhibited by EDTA and o-phenanthroline. RVV-X is a glycoprotein that consists of two disulfide linked subunits of molecular weights 67kD and 26kD and is highly pure and homogenous by SDS-PAGE.
Form	liquid
Molecular Mass	70,000
Purity	>95% by SDS-PAGE analysis
Usage	For in vitro laboratory use only
Notes	Optimal experimental conditions and working dilutions must be determined by the end user. Sample concentration and volume are for example purposes only and do not necessarily represent the product that will be received. Please contact us for a current lot-specific product datasheet.
Storage	-20°C
