

Recombinant Human FABP4

Cat. No. FABP4-3636H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human FABP4, fused with N-terminal methionin (highlighted), was expressed in E. coli.
Species	Human
Source	E.coli
Description	FABP4 encodes the fatty acid binding protein found in adipocytes. Fatty acid binding proteins are a family of small, highly conserved, cytoplasmic proteins that bind long-chain fatty acids and other hydrophobic ligands. It is thought that FABPs roles include fatty acid uptake, transport, and metabolism.

Notes	This product is intended for research use only.
Storage	Store lyophilized protein at –20°C. Lyophilized protein remains stable until the expiry date when stored at –20°C. Aliquot reconstituted protein to avoid repeated freezing/thawing cycles and store at –80°C for long term storage. Reconstituted protein can be stored at 4°C for a limited period of time; it does not show any change after one week at 4°C.
Reconstitution	Add deionized water to prepare a working stock solution of approximately 0.5 mg/mL and let the lyophilized pellet dissolve completely. Filter sterilize your culture media/working solutions containing this non-sterile product before using in cell culture.
Shipping	At ambient temperature. Upon receipt, store the product at the temperature recommended below.
