

Recombinant Chicken FAP Protein, K30-E759, N-His tagged

Cat. No. FAP-4123C Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Chicken FAP protein (K30-E759) with N-His tag was expressed in HEK293.
Species	Chicken
Source	HEK293
ProteinLength	K30-E759
Description	The protein encoded by this gene is a homodimeric integral membrane gelatinase belonging to the serine protease family. It is selectively expressed in reactive stromal fibroblasts of epithelial cancers, granulation tissue of healing wounds, and malignant cells of bone and soft tissue sarcomas. This protein is thought to be involved in the control of fibroblast growth or epithelial-mesenchymal interactions during development, tissue repair, and epithelial carcinogenesis. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
