

Recombinant Human FCN1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. FCN1-6728H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	FCN1 MS Standard C13 and N15-labeled recombinant protein (NP_001994) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The ficolin family of proteins are characterized by the presence of a leader peptide, a short N-terminal segment, followed by a collagen-like region, and a C-terminal fibrinogen-like domain. The collagen-like and the fibrinogen-like domains are also found separately in other proteins such as complement protein C1q, C-type lectins known as collectins, and tenascins. However, all these proteins recognize different targets, and are functionally distinct. Ficolin 1 encoded by FCN1 is predominantly expressed in the peripheral blood leukocytes, and has been postulated to function as a plasma protein with elastin-binding activity.
