

Recombinant Human GHR protein

Cat. No. GHR-39H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human GHR was expressed in E. coli.
Species	Human
Source	E.coli
Description	<p>GHBP is a transmembrane receptor for growth hormone. Binding of growth hormone to the receptor leads to receptor dimerization and the activation of an intra- and intercellular signal transduction pathway leading to growth. A common alternate allele of this gene, called GHRd3, lacks exon three and has been well-characterized. Mutations in this gene have been associated with Laron syndrome, also known as the growth hormone insensitivity syndrome (GHIS), a disorder characterized by short stature. Other splice variants, including one encoding a soluble form of the protein (GHRtr), have been observed but have not been thoroughly characterized.</p>
Form	GHBP was lyophilized from a concentrated (1mg/ml) solution with 0.0045mM NaHCO ₃ .
Molecular Mass	28107.01 Dalton

Purity

Greater than 98.0% as determined by:
(a) Analysis by SEC-HPLC.
(b) Analysis by SDS-PAGE.

Storage

Lyophilized Growth Hormone Binding Protein although stable at room temperature for 3 weeks, should be stored desiccated below -18 centigrade. Upon reconstitution GHBP should be stored at 4 centigrade between 2-7 days and for future use below -18 centigrade.
For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

Reconstitution

It is recommended to reconstitute the lyophilized Growth Hormone Binding Protein in sterile 18MΩ-cm H₂O not less than 100g/ml, which can then be further diluted to other aqueous solutions.
