

## Recombinant Human GOLGA2 Protein, GST-tagged

Cat. No. GOLGA2-01H Lot. No. (See product label)

### SPECIFICATION

<b>Product Overview</b>	Human GOLGA2 partial ORF (AAH06381.1, 1 a.a. - 120 a.a.) recombinant protein with GST-tag at N-terminal was expressed in Wheat Germ.
<b>Species</b>	Human
<b>Source</b>	Wheat Germ
<b>Description</b>	The Golgi apparatus, which participates in glycosylation and transport of proteins and lipids in the secretory pathway, consists of a series of stacked cisternae (flattened membrane sacs). Interactions between the Golgi and microtubules are thought to be important for the reorganization of the Golgi after it fragments during mitosis. This gene encodes one of the golgins, a family of proteins localized to the Golgi. This encoded protein has been postulated to play roles in the stacking of Golgi cisternae and in vesicular transport. Several alternatively spliced transcript variants of this gene have been described, but the full-length nature of these variants has not been determined.
<b>Molecular Mass</b>	38.94 kDa
