

## Native Helicobacter Pylori Antigen

Cat. No. HP-01 Lot. No. (See product label)

### SPECIFICATION

<b>Product Overview</b>	Helicobacter pylori antigen is a bacterial extract which has been partially purified by detergent extraction and centrifugation, manufactured for use in immunoassay development and other research applications. Bacteria are cultured on solid medium, harvested, washed and solubilised. The antigen is partially purified by detergent extraction and centrifugation. QC serum panel (multiple negative, borderline and positive sera) within defined reactivity range in Helicobacter pylori ELISA (IgA, IgG and IgM).
<b>Species</b>	Helicobacter pylori (Strain NCTC 11637)
<b>Form</b>	Liquid. 1 % non-ionic detergent solution.
<b>Purity</b>	Major bands comparable to Reference Standard on SDS-PAGE (reducing).
<b>Applications</b>	For immunoassay development or other applications.
<b>Notes</b>	No specific biological hazards are known to be associated with this product. It should be handled with appropriate safety precautions for biological materials.
<b>Storage</b>	At -80 centigrade
