

GMP Recombinant Mouse Hdgf Protein, His-Tagged

Cat. No. Hdgf-01M Lot. No. (See product label)

SPECIFICATION

Product Overview	GMP Recombinant Mouse Hdgf Protein, His-Tagged was expressed in Escherichia coli cell-derived in an animal component free process under cGMP guidelines.
Species	Mouse
Source	E.coli
Description	Predicted to enable several functions, including DNA-binding transcription repressor activity, RNA polymerase II-specific; cytoskeletal protein binding activity; and growth factor activity. Acts upstream of or within cellular response to interleukin-7 and negative regulation of neuron apoptotic process. Located in extracellular space and nucleus. Is expressed in several structures, including alimentary system; genitourinary system; liver; sensory organ; and telencephalon ventricular layer. Orthologous to human HDGF (heparin binding growth factor).
Form	Lyophilized

Purity	>98% as determined by SDS-PAGE analysis. Purified by Ni-NTA chromatography.
Notes	Please use within one month after protein reconstitution.
Storage	Lyophilized protein should be stored at -20°C. Upon reconstitution, protein aliquots should be stored at -20°C or -80°C.
Storage Buffer	The protein was lyophilized from a solution containing 1X PBS, pH 7.4.
Reconstitution	It is recommended to reconstitute the lyophilized protein in sterile H ₂ O to a concentration not less than 100 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient re-dissolved.
