

Recombinant Full Length Human IFFO1 Protein, GST-tagged

Cat. No. IFFO1-3694HF Lot. No. (See product label)

SPECIFICATION

Product Overview	Human HOM-TES-103 full-length ORF (NP_542769.2, 1 a.a. - 200 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	200 amino acids
Description	This gene is a member of the intermediate filament family. Intermediate filaments are proteins which are primordial components of the cytoskeleton and nuclear envelope. The proteins encoded by the members of this gene family are evolutionarily and structurally related but have limited sequence homology, with the exception of the central rod domain. Alternative splicing has been observed for this gene and three transcript variants encoding different isoforms have been identified. Other alternatively spliced transcripts may exist, but their biological validity has not been confirmed. [provided by RefSeq]
