

Recombinant Human IFNA2 therapeutic protein(Interferon alfa-2b)

Cat. No. IFNA2-P008H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Interferon, Alpha 2 therapeutic protein(human leukocyte clone hif-sn 206 protein moiety reduced). A type I interferon consisting of 165 amino acid residues with arginine in position 23. This protein is produced by recombinant DNA technology and resembles interferon secreted by leukocytes. It is used extensively as an antiviral or antineoplastic agent.
Species	Human
Source	E.coli
ProteinLength	165aa
Description	This gene is a member of the alpha interferon gene cluster on chromosome 9. The encoded protein is a cytokine produced in response to viral infection. Use of the recombinant form of this protein has been shown to be effective in reducing the symptoms and duration of the common cold. The expression product is the active ingredient of PEG-Intron, Untron PEG, Roferon-A and Intron-A.
