

Recombinant Human IGFBP3 Protein (28-291aa), N-His-tagged

Cat. No. IGFBP3-12H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human IGFBP3 (28-291aa), fused to His-tag at N-terminus, was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	28-291aa
Description	This gene is a member of the insulin-like growth factor binding protein (IGFBP) family and encodes a protein with an IGFBP domain and a thyroglobulin type-I domain. The protein forms a ternary complex with insulin-like growth factor acid-labile subunit (IGFALS) and either insulin-like growth factor (IGF) I or II. In this form, it circulates in the plasma, prolonging the half-life of IGFs and altering their interaction with cell surface receptors. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
Form	Liquid
