

Recombinant Human IL18BP Protein, His-tagged

Cat. No. IL18BP-315H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human IL18BP protein with His tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	194
Description	The protein encoded by this gene functions as an inhibitor of the proinflammatory cytokine, IL18. It binds IL18, prevents the binding of IL18 to its receptor, and thus inhibits IL18-induced IFN-gamma production, resulting in reduced T-helper type 1 immune responses. This protein is constitutively expressed and secreted in mononuclear cells. Elevated level of this protein is detected in the intestinal tissues of patients with Crohn's disease. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.
Form	Lyophilized
