

Recombinant Active Pig IL1B Protein, His-tagged(C-ter)

Cat. No. IL1B-163P Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Active Pig IL1B Protein with His tag (C-ter) was expressed in E. coli.
Species	Pig
Source	E.coli
Description	<p>The protein encoded by this gene is a member of the interleukin 1 cytokine family. This cytokine is produced by activated macrophages as a proprotein, which is proteolytically processed to its active form by caspase 1 (CASP1/ICE). This cytokine is an important mediator of the inflammatory response, and is involved in a variety of cellular activities, including cell proliferation, differentiation, and apoptosis. The induction of cyclooxygenase-2 (PTGS2/COX2) by this cytokine in the central nervous system (CNS) is found to contribute to inflammatory pain hypersensitivity. This gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. [provided by RefSeq, Jul 2008]</p>
Form	Powder
Bio-activity	Determined by its ability to induce D10.G4.1 cells proliferation. The ED50 for this effect is < 3 ng/mL.
