

Recombinant Active Pig IL2 Protein, His-tagged(C-ter)

Cat. No. IL2-171P Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Active Pig IL2 Protein with His tag (C-ter) was expressed in E. coli.
Species	Pig
Source	E.coli
Description	The protein encoded by this gene is a secreted cytokine that is important for the proliferation of T and B lymphocytes. The receptor of this cytokine is a heterotrimeric protein complex whose gamma chain is also shared by interleukin 4 (IL4) and interleukin 7 (IL7). The expression of this gene in mature thymocytes is monoallelic, which represents an unusual regulatory mode for controlling the precise expression of a single gene. The targeted disruption of a similar gene in mice leads to ulcerative colitis-like disease, which suggests an essential role of this gene in the immune response to antigenic stimuli. Form	Powder
Bio-activity	Determined by its ability to induce proliferation in CTLL2 cells. The ED50 for this effect is < 0.5 ng/mL.
