

Recombinant Full Length Human IL3RA Protein

Cat. No. IL3RA-1007HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human IL3RA full-length ORF (NP_002174.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	378 amino acids
Description	<p>The protein encoded by this gene is an interleukin 3 specific subunit of a heterodimeric cytokine receptor. The receptor is comprised of a ligand specific alpha subunit and a signal transducing beta subunit shared by the receptors for interleukin 3 (IL3), colony stimulating factor 2 (CSF2/GM-CSF), and interleukin 5 (IL5). The binding of this protein to IL3 depends on the beta subunit. The beta subunit is activated by the ligand binding, and is required for the biological activities of IL3. This gene and the gene encoding the colony stimulating factor 2 receptor alpha chain (CSF2RA) form a cytokine receptor gene cluster in a X-Y pseudoautosomal region on chromosomes X or Y. Alternatively spliced transcript variants encoding distinct isoforms have been found.</p>
