

Recombinant Human IL6R Protein, C13 and N15 Labeled

Cat. No. IL6R-517H Lot. No. (See product label)

SPECIFICATION

Product Overview	C13 and N15 Labeled Recombinant human IL6R protein
Species	Human
ProteinLength	468
Description	<p>This gene encodes a subunit of the interleukin 6 (IL6) receptor complex. Interleukin 6 is a potent pleiotropic cytokine that regulates cell growth and differentiation and plays an important role in the immune response. The IL6 receptor is a protein complex consisting of this protein and interleukin 6 signal transducer (IL6ST/GP130/IL6-beta), a receptor subunit also shared by many other cytokines. Dysregulated production of IL6 and this receptor are implicated in the pathogenesis of many diseases, such as multiple myeloma, autoimmune diseases and prostate cancer. Alternatively spliced transcript variants encoding distinct isoforms have been identified in this gene. A pseudogene of this gene is found on chromosome 9.</p>
