

Recombinant Human KDR protein, Fc-tagged, APC labeled

Cat. No. KDR-31716THA **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human KDR protein, Fc-tagged was Conjugated with NH ₂ -Reactive APC(Allophycocyanin).
Species	Human
Source	Insect Cells
Description	NH ₂ -Reactive Allophycocyanin is used for antibody conjugation for immunostaining and cellular proteins for tracing. NH ₂ -Reactive Allophycocyanin has succinimidyl ester groups, and can easily make a covalent bond with amino groups of protein without any activation process.
Form	Liquid in sterile PBS buffer pH 7.4 (may contains tiny amount of reaction buffer and Allophycocyanin).
Endotoxin	<1EU/ug by LAL method.
Stability	Sample is stable for at least 12 months when stored at -20 to -80°C from date of manufacture. For longer storage, add equal volume of glycerol to the sample solution and store at -20 to -80°C.
Storage	Store under sterile conditions at -20 to -80°C immediately after receipt. It is recommended that the protein be aliquoted for optimal storage. Avoid freeze-thaw cycles.
