

## Human IL-6 Detection Kit

**Cat. No.** KITF-043    **Lot. No.** (See product label)

### SPECIFICATION

<b>Product Overview</b>	IL-6 (Interleukin-6) is a cytokine produced by various cells that plays an important role in the immune system and inflammatory response. IL-6 is often used as a content detection item in the production process of cellular drugs. The "Human IL-6 ELISA KIT" uses a dual antibody sandwich ELISA method, which can accurately, specifically, and conveniently detect the content of IL-6 in cell culture supernatant, as well as in biological samples such as serum, plasma, and tissue homogenate.
