

Recombinant Full Length Human KRT15 Protein

Cat. No. KRT15-6960HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human full-length Cytokeratin protein (amino acids 1-456) , fused with proprietary tag was expressed in Wheat germ.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	456 amino acids
Description	The protein encoded by this gene is a member of the keratin gene family. The keratins are intermediate filament proteins responsible for the structural integrity of epithelial cells and are subdivided into cytokeratins and hair keratins. Most of the type I cytokeratins consist of acidic proteins which are arranged in pairs of heterotypic keratin chains and are clustered in a region on chromosome 17q21.2.
Form	Liquid
