

Thrombin Activity Fluorometric Assay Kit

Cat. No. Kit-0338 **Lot. No.** (See product label)

SPECIFICATION

Product Overview Simple & convenient protocol.
Can detect thrombin activity as low as.
Kit contains all necessary reagents for measuring thrombin activity.

Description Thrombin enzyme (Factor IIa, EC 3.4.21.5), a Serine protease, is an important clotting factor in the coagulation cascade that involves the conversion of soluble fibrinogen to insoluble active fibrin strands. In this pathway, Prothrombin is proteolytically converted into an active Thrombin. Thrombin is also a potent vasoconstrictor and mitogen implicated as a major factor in vasospasm following subarachnoid hemorrhage. Ruptured cerebral aneurysm blood clots around a cerebral artery releases thrombin, which in turn induces acute and prolonged narrowing of the blood vessel, potentially resulting in cerebral ischemia and infarction (stroke). In addition, it is a pro-inflammatory enzyme that may influence the onset and progression of atherosclerosis. Thrombin activity assay kit utilizes the ability of Thrombin to proteolytically cleave a synthetic substrate and release a fluorophore, AMC, which can be easily quantified by fluorescence reader. This assay kit is simple, rapid and can detect Thrombin activity as low as 1 ng in samples.

Applications Determine activity of pure Thrombin, Detect the activity of Thrombin in plasma

Usage For Research Use Only! Not For Use in Humans.

Storage -20°C

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Size	100 assays
Kit Components	<ul style="list-style-type: none">• Thrombin Dilution Buffer• Thrombin Assay Buffer• Thrombin Enzyme Standard• Thrombin Substrate
Detection method	Fluorescence (Ex/Em = 350/450 nm)
Compatible Sample Types	Plasma
