

# LOX Fluorometric Assay Kit

**Cat. No.** Kit-0520    **Lot. No.** (See product label)

## SPECIFICATION

<b>Product Overview</b>	LOX Assay Kit (Fluorometric) is designed for the measurement of LOX.
<b>Description</b>	Lysyl oxidase is an extracellular enzyme that catalyzes formation of aldehydes from lysine residues in collagen and elastin precursors. These aldehydes are highly reactive, and undergo spontaneous chemical reactions with other lysyl oxidase-derived aldehyde residues or with unmodified lysine residues. The chemical reactions result in cross-linking collagen and elastin, which is essential for stabilization of collagen fibrils and for the integrity and elasticity of mature elastin. The activity of Lysyl oxidase in biological samples is traditionally assessed by tritium release end-point assays using radio isotope labeled collagen or elastin substrates.
<b>Usage</b>	For research use only (RUO)
<b>Storage</b>	Keep in freezer Avoid exposure to light.
<b>Kit Components</b>	Component A: Amplite HRP Substrate (light sensitive) 1 vial Component B: Assay Buffer 50 ml Component C: Horseradish Peroxidase (50 units) 1 vial Component D: DMSO 200 µl
<b>Compatible Sample Types</b>	Biological samples
<b>Features &amp; Benefits</b>	Sensitive: Detect as low as 40 ng lysyl oxidase in solution. Continuous: Easily adapted to automation without a separation step. Convenient: Formulated to have minimal hands-on time. No wash is required. Non-Radioactive: No special requirements for
