

# Granzyme B Activity Fluorometric Assay Kit

**Cat. No.** Kit-2268    **Lot. No.** (See product label)

## SPECIFICATION

### Product Overview

Granzyme B (GZMB, EC number 3.4.21.79) also known as Granzyme-2 is a serine protease stored in the granules of activated cytotoxic T cells and NK cells. Upon target cell contact, Granzyme B is directionally exocytosed and with the assistance of perforin enters the target cell. With its unique substrate specificity (Granzyme B prefers an aspartic acid residue at the P1 site of its substrates), Granzyme B processes and activates various pro-caspases thereby inducing apoptosis in the target cell. In Granzyme B Activity Assay Kit, active human Granzyme B enzyme hydrolyzes the specific substrate to release the quench of fluorescent group, which can be detected fluorometrically at Ex/Em = 380/500 nm. This Assay Kit is rapid, reliable and sensitive and can detect Granzyme B activity in various biological samples.

### Applications

Measurement of Granzyme B activity in various biological samples or purified Granzyme B activity, Screening Granzyme B inhibitors, characterize/Study Granzyme B inhibitors.

### Storage

-20°C

### Shipping

Gel Pack

### Size

100 assays

### Kit Components

Granzyme B Assay Buffer; Granzyme B Substrate; Positive Control (Granzyme B Enzyme, human recombinant); AFC Standard (1mM)

**Detection method** Fluorescence (Ex/Em = 380/500 nm)

**Features & Benefits** Simple and Sensitive;  
Rapid and convenient;  
Kit contains all necessary reagents for measuring Granzyme B Activity.
