

## Glucose-6-Phosphate Dehydrogenase Kit

Kit-2450

Lot. No. (See product label)

### Specification

#### Product Overview

GLUCOSE-6-PHOSPHATE DEHYDROGENASE (G6PDH) is a cytosolic enzyme in the pentose phosphate pathway which supplies reducing energy to cells by maintaining the level of the co-enzyme nicotinamide adenine dinucleotide phosphate (NADPH). G6PDH reduces nicotinamide adenine dinucleotide phosphate (NADP) to NADPH while oxidizing glucose-6-phosphate (G6P). Humans with a genetic deficiency of G6PDH are predisposed to non-immune hemolytic anemia. The non-radioactive, colorimetric G6PDH assay is based on the reduction of the tetrazolium salt MTT in a NADPH-coupled enzymatic reaction to a reduced form of MTT which exhibits an absorption maximum at 565 nm. The increase in absorbance at 565 nm is proportional to the enzyme activity.

#### Storage

-20°C

#### Shipping

RT

#### Size

100 tests

#### Detection method

OD460nm

#### Compatible Sample Types

Plasma, serum, tissue and culture media, etc

#### Features & Benefits

Fast and sensitive. Linear detection range (20 µL sample): 0.2 to 100 U/L for 15 min reaction. Convenient and high-throughput. Homogeneous 'mix-incubate-measure' type assay. Can be readily automated on HTS liquid handling systems for processing thousands of samples per day.

#### Assay time

20 min

#### Sensitivity

0.2 U/L
