

Active Native Datura Stramonium Lectin Protein, Agarose bound

Cat. No. Lectin-1765D **Lot. No.** (See product label)

SPECIFICATION

Product Overview	This product is the Agarose bound Datura Stramonium Lectin and has sugar specificity to [GlcNAc]1-3, N-Acetylglucosamine.
Species	Datura stramonium
Source	Datura stramonium
Description	DSL contains two chains of 40 kDa and 46 kDa joined by disulfide bonds. This lectin is free of a reported 32 kDa contaminant protein. The carbohydrate binding site recognizes (β-1,4) linked N-acetylglucosamine oligomers, preferring chitobiose or chitotriose over a single N-acetylglucosamine residue. This lectin binds well in the acidic pH range but its affinity decreases above pH 8.0.
Bio-activity	10 mM HEPES, pH 7.5, 0.15 M NaCl, 0.1 mM Ca ²⁺ , 0.08% sodium azide
Molecular Mass	86 Kda
Applications	Glycobiology, Affinity Chromatography
Storage	Refrigerate.DO NOT FREEZE.
Concentration	2 ml of settled gel (1:1, v/v slurry) Protein Concentration 3.0 mg/ml of settled gel
