

Active Native Ricinus Communis Agglutinin I Protein

Cat. No. Lectin-1833R **Lot. No.** (See product label)

SPECIFICATION

Product Overview	This product is the Unconjugated Ricinus Communis Agglutinin I and has sugar specificity against galactose and lactose.
Species	Ricinus Communis
Source	Ricinus Communis
Description	This lectin consists of two subunits of 60 kDa which can be dissociated by reducing agents into closely related chains between 27 kDa and 33 kDa. One of the chains appears to be common to the “B” chain of another castor bean lectin, ricin, while the other chain is unique to RCA I. The B chain binds to galactose or N-acetylgalactosamine residues of membrane glycoconjugates.
Form	10 mM phosphate, 0.15 M NaCl, pH 7.8, 0.08% sodium azide,
Bio-activity	Inhibiting/Eluting Sugar: 200 mM galactose or lactose Carbohydrate-Binding Specificity: Galactose, Lactose.
Molecular Mass	120 kDa
Applications	Immunohistochemistry / Immunocytochemistry, Immunofluorescence, Blotting Applications, Glycobiology, Mitogenic Stimulation
Usage	EXERCISE CAUTION IN ITS USE! It has been found to have moderate toxicity in some animal models, but its toxicity to humans has not been fully determined, and a

related protein, RCA 60, is highly toxic to humans. Never pipet solutions of this lectin by mouth. DO NOT LYOPHILIZE!

Storage

Refrigerate in the dark. If a precipitate occurs during storage, warm solutions to 37 centigrade before removing aliquots

Concentration

5.0 mg/ml

GENE INFORMATION

Synonyms

Lectin; RCA I; RCA 120
