

Recombinant Human MMP13 Protein (E103-N274), His tagged

Cat. No. MMP13-0833H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human 6His-TEV-MMP2(E103-N274) Protein was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	E103-N274
Description	<p>Plays a role in the degradation of extracellular matrix proteins including fibrillar collagen, fibronectin, TNC and ACAN. Cleaves triple helical collagens, including type I, type II and type III collagen, but has the highest activity with soluble type II collagen. Can also degrade collagen type IV, type XIV and type X. May also function by activating or degrading key regulatory proteins, such as TGFB1 and CCN2. Plays a role in wound healing, tissue remodeling, cartilage degradation, bone development, bone mineralization and ossification. Required for normal embryonic bone development and ossification. Plays a role in the healing of bone fractures via endochondral ossification. Plays a role in wound healing, probably by a mechanism that involves proteolytic activation of TGFB1 and degradation of CCN2. Plays a role in keratinocyte migration during wound healing. May play a role in cell migration and in tumor cell invasion.</p>
Form	Liquid
Endotoxin	< 0.01 EU per µg of the protein
