

Recombinant Full Length Human MOG Protein, GST-tagged

Cat. No. MOG-6302HF Lot. No. (See product label)

SPECIFICATION

Product Overview Human MOG full-length ORF (AAH35938, 1 a.a. - 295 a.a.) recombinant protein with GST-tag at N-terminal.

Species Human

Source In Vitro Cell Free System

Protein Length 295 amino acids

Description The product of this gene is a membrane protein expressed on the oligodendrocyte cell surface and the outermost surface of myelin sheaths. Due to this localization, it is a primary target antigen involved in immune-mediated demyelination. This protein may be involved in completion and maintenance of the myelin sheath and in cell-cell communication. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq]
