

Recombinant SARS-CoV-2 Nucleocapsid Protein (D63G), His-tagged

Cat. No. N-09S **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Full-length SARS-CoV-2 Nucleocapsid protein, Met1-Ala419, with point mutation D63G and a C-terminal His-tag. D63G mutation is the same NP mutation which was identified on the SARS-CoV-2 variant (B.1.617) which emerged in India.
Species	SARS-CoV-2
Source	E.coli
Description	The nucleocapsid (N) protein is the structural component of the viral structure and it primarily functions to bind coronavirus RNA genome. The N protein is the most abundant protein in coronavirus. It is normally very conserved and is highly immunogenic phosphoprotein. It is also involved in CoV replication cycle and the host cellular response to viral infection. The localization of N to the endoplasmic reticulum (ER)-Golgi region has proposed a function for it in assembly and budding. This protein can be used as a marker for diagnostic tests for Covid-19.
Form	Frozen liquid
Endotoxin	< 0.1 EU/μg
Storage	The protein is stable in a liquid state at -70 centigrade for 12 months. Avoid repeated freeze-thaw cycles
Storage Buffer	PBS

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Shipping Dry ice

GENE INFORMATION

Gene Name N nucleocapsid phosphoprotein [Severe acute respiratory syndrome coronavirus 2]

Official Symbol N

Synonyms N; nucleocapsid phosphoprotein; nucleocapsid phosphoprotein; ORF9; structural protein

Gene ID 43740575

mRNA Refseq MN908947

Protein Refseq YP_009724397

SDS-PAGE
