

Recombinant Human NLGN4X Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. NLGN4X-4366H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	NLGN4X MS Standard C13 and N15-labeled recombinant protein (NP_851849) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the type-B carboxylesterase/lipase protein family. The encoded protein belongs to a family of neuronal cell surface proteins. Members of this family may act as splice site-specific ligands for beta-neurexins and may be involved in the formation and remodeling of central nervous system synapses. The encoded protein interacts with discs large homolog 4 (DLG4). Mutations in this gene have been associated with autism and Asperger syndrome. Alternative splicing results in multiple transcript variants.
