

Recombinant Full Length Human NPPA Protein, Flag tagged

Cat. No. NPPA-22HFL Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Full Length Human NPPA Protein with Flag tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	1-151 aa
Description	<p>The protein encoded by this gene belongs to the natriuretic peptide family. Natriuretic peptides are implicated in the control of extracellular fluid volume and electrolyte homeostasis. This protein is synthesized as a large precursor (containing a signal peptide), which is processed to release a peptide from the N-terminus with similarity to vasoactive peptide, cardiodilatin, and another peptide from the C-terminus with natriuretic-diuretic activity. Mutations in this gene have been associated with atrial fibrillation familial type 6. This gene is located adjacent to another member of the natriuretic family of peptides on chromosome 1.</p>
