

Recombinant Human PAX4 Protein, His-tagged

Cat. No. PAX4-392H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human PAX4 fused with His tag at N-terminal was expressed in E. coli.
Species	Human

Description	This gene is a member of the paired box (PAX) family of transcription factors. Members of this gene family typically contain a paired box domain, an octapeptide, and a paired-type homeodomain. These genes play critical roles during fetal development and cancer growth. The paired box 4 gene is involved in pancreatic islet development and mouse studies have demonstrated a role for this gene in differentiation of insulin-producing beta cells.
