

## Active Recombinant Human PDCD1 Protein, hFc-tagged, Alexa Fluor 647 conjugated

Cat. No. PDCD1-032HAF647 Lot. No. (See product label)

### SPECIFICATION

**Product Overview** The Alexa Fluor 647 conjugated extracellular domain of human CD279 [PD-1] (NP\_005009.2) (Leu25-Gln167) is fused to the N-terminus of the Fc region of human IgG1 was expressed in CHO cell.

**Species** Human

**Source** CHO

**ProteinLength** 25-167 a.a.

**Description** This gene encodes a cell surface membrane protein of the immunoglobulin superfamily. This protein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice, expression of this gene is induced in the thymus when anti-CD3 antibodies are injected and large numbers of thymocytes undergo apoptosis. Mice deficient for this gene bred on a BALB/c background developed dilated cardiomyopathy and died from congestive heart failure. These studies suggest that this gene product may also be important in T cell function and contribute to the prevention of autoimmune diseases

**Form** Lyophilized

**Bio-activity** Measured by its binding ability in a functional ELISA.

**Molecular Mass** 46 kDa (monomer)
