

## Recombinant Human PLS3 Protein, MYC/DDK-tagged

Cat. No. PLS3-2156H Lot. No. (See product label)

### SPECIFICATION

<b>Product Overview</b>	Recombinant human PLS3 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293
<b>Species</b>	Human
<b>Source</b>	HEK293
<b>Description</b>	<p>Plastins are a family of actin-binding proteins that are conserved throughout eukaryote evolution and expressed in most tissues of higher eukaryotes. In humans, two ubiquitous plastin isoforms (L and T) have been identified. Plastin 1 (otherwise known as Fimbrin) is a third distinct plastin isoform which is specifically expressed at high levels in the small intestine. The L isoform is expressed only in hemopoietic cell lineages, while the T isoform has been found in all other normal cells of solid tissues that have replicative potential (fibroblasts, endothelial cells, epithelial cells, melanocytes, etc.). The C-terminal 570 amino acids of the T-plastin and L-plastin proteins are 83% identical. It contains a potential calcium-binding site near the N terminus. Alternate splicing results in multiple transcript variants.[provided by RefSeq, Feb 2010].</p>
<b>Form</b>	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.
<b>Molecular Mass</b>	68 kDa
<b>Purity</b>	> 80% as determined by SDS-PAGE and Coomassie blue staining

 45-1 Ramsey Road, Shirley, NY 11967, USA

**Concentration** >50 ug/mL as determined by microplate BCA method

## GENE INFORMATION

**Gene Name** PLS3 plastin 3 [ Homo sapiens ]

**Official Symbol** PLS3

**Synonyms** BMND18; T-plastin

**Gene ID** 5358

**mRNA Refseq** NM\_001136025

**Protein Refseq** NP\_001129497

**MIM** 300131

**UniProt ID** P13797
