

## Human Placenta Membrane Lysate

Cat. No. Placenta-387H Lot. No. (See product label)

### SPECIFICATION

|                      |                   |
|----------------------|-------------------|
| <b>Species</b>       | Human             |
| <b>Source</b>        | Human Placenta    |
| <b>Concentration</b> | 2 mg/mL or better |
| <b>Tissue Type</b>   | Placenta          |
| <b>Shipping</b>      | Dry ice           |

**Preparation method**

Human placenta tissue membrane protein lysate was prepared by isolating the membrane protein from whole tissue homogenates using a proprietary technique. The human placenta tissue was frozen in liquid nitrogen immediately after excision and then stored at -70°C. The membrane protein is provided in a buffer including HEPES (pH 7.9), MgCl<sub>2</sub>, KCl, EDTA, Sucrose, Glycerol, sodium deoxycholate, NP-40, and a cocktail of protease inhibitors. For quality control purposes, the isolated placenta tissue membrane protein pattern on SDS-PAGE gel is shown to be consistent for each lot by visualization with coomassie blue staining. The isolated placenta tissue membrane protein is then Western analyzed by either GAPDH or  $\beta$ -actin antibody to confirm there is no signal or very weak signal.

**Diagnosis** Normal

**Storage Buffer** HEPES pH 7.9, MgCl<sub>2</sub>, KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, and NP-40.

**Storage Instruction**

Store at 2-8°C for continuous use. For extended storage, freeze working aliquots at -70°C. Repeated freezing and thawing is not recommended. Under proper storage conditions the shelf life is half a year from the date of receipt.

**Applications**

Placenta membrane protein lysate is for use in Western blotting, 10 µg to 20 µg per lane is recommended for mini gel.
