

Recombinant Bovine Prion Protein (Q228R), His-tagged

Cat. No. Prnp-802B Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Bovine Prion Protein (Q228R) was expressed in E. coli with His tag.
Species	Bovine
Source	E.coli
Description	N-terminal His-tagged mutant (Q228R) mature PrPc. The protein may be reconstituted in detergentcontaining buffers e.g. TX-100 (0.5%) or under mild denaturing conditions (e.g. 1.5 M guanidine-HCl or urea). The bovine PrPc (Q228R) is a homologue to the disease-associated human (Q217R) point mutation. It may be used as substrate to investigate the effect of this mutation on protein stability in in vitro/in vivo conversion studies.
Form	Lyophilized from 10 mM Tris-HCl pH 6.7
Purity	> 95 % (SDS-PAGE)
Storage	Store at -80 centigrade, avoid freeze/thaw cycles.
