

Recombinant Full Length Human RORA Protein, C-Flag-tagged

Cat. No. RORA-581HFL Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Full Length Human RORA Protein, fused to Flag-tag at C-terminus, was expressed in Mammalian cells.
Species	Human
Source	Mammalian Cells
Description	The protein encoded by this gene is a member of the NR1 subfamily of nuclear hormone receptors. It can bind as a monomer or as a homodimer to hormone response elements upstream of several genes to enhance the expression of those genes. The encoded protein has been shown to interact with NM23-2, a nucleoside diphosphate kinase involved in organogenesis and differentiation, as well as with NM23-1, the product of a tumor metastasis suppressor candidate gene. Also, it has been shown to aid in the transcriptional regulation of some genes involved in circadian rhythm. Four transcript variants encoding different isoforms have been described for this gene.
Form	25 mM Tris HCl, pH 7.3, 100 mM glycine, 10% glycerol.
Molecular Mass	58.8 kDa

Purity > 80% as determined by SDS-PAGE and Coomassie blue staining.

Stability Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.

Storage Store at -80 centigrade.

Concentration >50 ug/mL as determined by microplate BCA method.

Preparation Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.

Protein Families Druggable Genome, Nuclear Hormone Receptor, Transcription Factors

Full Length Full L.

GENE INFORMATION

Gene Name RORA RAR related orphan receptor A [Homo sapiens (human)]

Official Symbol RORA

Synonyms ROR1; ROR2; ROR3; RZRA; NR1F1; IDDECA; RZR-ALPHA
