

Recombinant Human RRAGB Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. RRAGB-5293H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	RRAGB MS Standard C13 and N15-labeled recombinant protein (NP_006055) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	Ras-homologous GTPases constitute a large family of signal transducers that alternate between an activated, GTP-binding state and an inactivated, GDP-binding state. These proteins represent cellular switches that are operated by GTP-exchange factors and factors that stimulate their intrinsic GTPase activity. All GTPases of the Ras superfamily have in common the presence of six conserved motifs involved in GTP/GDP binding, three of which are phosphate-/magnesium-binding sites (PM1-PM3) and three of which are guanine nucleotide-binding sites (G1-G3). Transcript variants encoding distinct isoforms have been identified.
Molecular Mass	40.2 kDa

Purity > 80% as determined by SDS-PAGE and Coomassie blue staining

Stability Stable for 3 months from receipt of products under proper storage and handling conditions.

Storage Store at -80 centigrade. Avoid repeated freeze-thaw cycles.

Concentration 50 µg/mL as determined by BCA

Storage Buffer 100 mM glycine, 25 mM Tris-HCl, pH 7.3.

GENE INFORMATION

Gene Name RRAGB Ras-related GTP binding B [Homo sapiens (human)]

Official Symbol RRAGB

Synonyms RRAGB; Ras-related GTP binding B; ras-related GTP-binding protein B; rag B; GTP-binding protein ragB; RAGB; bA465E19.1;

Gene ID 10325

mRNA Refseq NM_006064

Protein Refseq NP_006055

MIM 300725
