

Recombinant Human RTN4 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. RTN4-756H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	RTN4 MS Standard C13 and N15-labeled recombinant protein (NP_997403) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene belongs to the family of reticulon encoding genes. Reticulons are associated with the endoplasmic reticulum, and are involved in neuroendocrine secretion or in membrane trafficking in neuroendocrine cells. The product of this gene is a potent neurite outgrowth inhibitor which may also help block the regeneration of the central nervous system in higher vertebrates. Alternatively spliced transcript variants derived both from differential splicing and differential promoter usage and encoding different isoforms have been identified.
