

Active Recombinant 2019-nCoV Spike protein RBD (K417N) Protein, His-tagged

Cat. No. S-592S Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant 2019-nCoV Spike protein S1 subunit, RBD (K417N) (319-541) was expressed in CHO cells using a C-terminal his tag.
Species	SARS-CoV-2
Source	CHO
ProteinLength	319-541
Description	<p>Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is an enveloped, positive-sense, single-stranded RNA virus that causes coronavirus disease 2019 (COVID-19). Virus particles include the RNA genetic material and structural proteins needed for invasion of host cells. Once inside the cell the infecting RNA is used to encode structural proteins that make up virus particles, nonstructural proteins that direct virus assembly, transcription, replication and host control and accessory proteins whose function has not been determined.~ The structural proteins of SARS-CoV-2 include the envelope protein (E), spike or surface glycoprotein (S), membrane protein (M) and the nucleocapsid protein (N). The spike glycoprotein is found on the outside of the virus particle and gives coronavirus viruses their crown-like appearance. This glycoprotein mediates attachment of the virus particle and entry into the host cell. S protein is an important target for vaccine development, antibody therapies and diagnostic antigen-based tests.</p>

Bio-activity	Binding ability measured in a functional ELISA. 2019-nCoV spike protein RBD (K417N) binds to immobilized human ACE2 (19-740) protein.
Molecular Mass	39 kDa
Purity	>90 %
Stability	One year at -70 centigrade from date of shipment.
Storage	Store product at -70 centigrade. For optimal storage, aliquot targets into smaller quantities after centrifugation and store at the recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
Concentration	1.0 µg/µL
Storage Buffer	Recombinant protein stored in 50mM sodium phosphate, pH 7.5, 300mM NaCl, 150mM imidazole.
Shipping	On dry ice.
GENE INFORMATION	
Gene Name	S surface glycoprotein [Severe acute respiratory syndrome coronavirus 2]
Official Symbol	S
Synonyms	S; surface glycoprotein; spike glycoprotein; surface glycoprotein; structural protein; spike protein
Gene ID	43740568

mRNA Refseq [MN908947](#)

Protein Refseq [YP_009724390](#)

Activity

Binding ability measured in a functional ELISA. 2019-nCoV spike protein RBD (K417N) binds to immobilized human ACE2 (19-740) protein.

Purity

The purity of 2019-nCoV Spike protein RBD (K417N) was determined to be >90% by densitometry, approx. MW 39 kDa.
