

Active Recombinant Canine SERPINE1

Cat. No. SERPINE1-90C Lot. No. (See product label)

SPECIFICATION

Product Overview	Glycosylated wild type dog PAI-1 produced in insect cells. Latent form.
Species	Canine
Source	Insect Cells
Description	<p>PAI-1 is a serine protease inhibitor (serpin) that functions as the principal inhibitor of tissue plasminogen activator (tPA) and urokinase (uPA), the activators of plasminogen and hence fibrinolysis (the physiological breakdown of blood clots). It is a serine protease inhibitor (serpin) protein (SERPINE1). The other PAI, plasminogen activator inhibitor-2 (PAI-2) is secreted by the placenta and only present in significant amounts during pregnancy. In addition, protease nexin acts as an inhibitor of tPA and urokinase. PAI-1, however, is the main inhibitor of the plasminogen activators.</p>
