

Recombinant Human SOX10 Protein, Tag Free

Cat. No. SOX10-01H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human SOX10 protein without tag was expressed in E. coli
Species	Human
Source	E.coli
Description	This gene encodes a member of the SOX (SRY-related HMG-box) family of transcription factors involved in the regulation of embryonic development and in the determination of the cell fate. The encoded protein may act as a transcriptional activator after forming a protein complex with other proteins. This protein acts as a nucleocytoplasmic shuttle protein and is important for neural crest and peripheral nervous system development. Mutations in this gene are associated with Waardenburg-Shah and Waardenburg-Hirschsprung disease.
Molecular Mass	The protein has a calculated MW of 50 kDa.
