

Recombinant Human STING1 R232, K224R mutant Protein, His-tagged

Cat. No. STING1-149H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	N-terminally Histidine-tagged human STING R232, K224R mutant purified from E. coli.
Species	Human
Source	E.coli
ProteinLength	138-379 (N-terminal truncation)
Description	This gene encodes a five transmembrane protein that functions as a major regulator of the innate immune response to viral and bacterial infections. The encoded protein is a pattern recognition receptor that detects cytosolic nucleic acids and transmits signals that activate type I interferon responses. The encoded protein has also been shown to play a role in apoptotic signaling by associating with type II major histocompatibility complex. Mutations in this gene are the cause of infantile-onset STING-associated vasculopathy. Alternate splicing results in multiple transcript variants.
Molecular Mass	28.8 kDa
Purity	≥70% estimated by SDS-PAGE
