

Native purified SUMO Protease, N-His-tagged

Cat. No. SUMO Protease-01 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SUMO (Small Ubiquitin-like MOdifiers) Protease is a highly purified Ulp1 from a E. coli expression system, which carries the yeast Ulp1. It recognizes the tertiary structure of SUMO and cleaves SUMO from recombinant fusion proteins. The SUMO protease has a N-terminal His-tag and can be removed by Ni-NTA agarose.
