

Active Recombinant Mouse Shh Protein

Cat. No. Shh-5862M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of Mouse sonic hedgehog (Shh) without tag was expressed in E. coli.
Species	Mouse
Source	E.coli
Description	The C-terminal part of the sonic hedgehog protein precursor displays an autoproteolysis and a cholesterol transferase activity. Both activities result in the cleavage of the full-length protein into two parts (ShhN and ShhC) followed by the covalent attachment of a cholesterol moiety to the C-terminal of the newly generated ShhN. Both activities occur in the reticulum endoplasmic. Once cleaved, ShhC is degraded in the endoplasmic reticulum.
Bio-activity	Determined by its ability to induce alkaline phosphatase production by C3H/10T1/2 (CCL-226) cells. The expected ED50 for this effect is 0.5-1.0µg/mL.
Molecular Mass	20 kDa
